EDUCATION

University of California, San Diego

B.S. in Data Science

La Jolla, CA

Expected June 2029

EXPERIENCE

Data Analyst – Team Lead

Jun 2026 – Present

IDX Exchange

Remote

- Built and shipped an end-to-end CA real estate market analysis pipeline in Python (pandas, GeoPandas), sourcing and cleaning multi-year CRMLS MLS data via the Trestle API and enriching it with FRED mortgage-rate data, then catching and fixing a data-quality bug that was causing 16,000%+ close-to-list ratio outliers.
- Engineered spatial features via a GeoPandas join against CA school district boundaries (70–73% match rate) and built two published Tableau Public dashboards, including a dual-axis dumbbell chart comparing list vs. close price.
- Led a four-person analyst team as Team Lead — running weekly meetings, tracking team accountability and GitHub activity, and acting as primary liaison to program leadership across a 12-week, ~388-intern program.

Data Analyst

Oct 2025 – Present

TritonBall Sports Analytics @ UC San Diego

La Jolla, CA

- Built a basketball shot quality model evaluating offensive efficiency beyond traditional box scores, combining spatial tracking data and play context to quantify true scoring value on a per-possession basis.
- Contributed to published research and attended workshops on sports analytics methods, while supporting the UCSD Tennis team with data-driven insights on player performance and competitive strategy.

Vice Marketing Director

Nov 2025 – Present

Data Science Student Society @ UC San Diego

La Jolla, CA

- Stepped up to lead the content team while the Director is abroad, coordinating with programming, outreach, and design teams across 10+ events to align on creative direction, timelines, and promotional rollout.
- Produced photo/video content and led social media campaigns using Premiere Pro, driving measurable engagement growth and consistently boosting attendance at club events.

Tutor

Feb 2025 – Jun 2025

Schoolhouse

Remote

- Built adaptive lesson plans for high-achieving SAT Math students aiming above 700, tailoring each session to where individual students were while keeping materials clear, organized, and easy to follow.
- Ran live virtual group sessions using Khan Academy-aligned curriculum with up to ten students at a time, helping them improve both scores and confidence — and consistently getting strong feedback doing it.

Lead Photographer

2023 – 2024

Moda Magazine

Davis, CA

- Ran creative direction and shoot logistics for magazine photoshoots from start to finish and created imagery that made it into every issue, including the cover, while pushing editorial quality forward.
- Mentored a team of photographers through training materials and hands-on guidance, building a more collaborative workflow and raising the bar for what made it to print.

PROJECTS

Vent – Geothermal Site Intelligence & Risk Certification Platform

April 2026

- Built an AI-powered geothermal site evaluation platform at DataHacks 2026, cutting site due diligence from 3–6 months to under 10 minutes using geological datasets and automated risk scoring.
- Pitched a full product narrative — market sizing, customer personas, and live demo — to judges at UCSD's 450+ participant MLH-certified hackathon in the Product & Entrepreneurship track (\$25,000 prize pool).

AP Exam Fee Subsidies and College Access | *Python, Tableau*

Jan 2026 – Mar 2026

- Built a state-level AP exam fee history dataset by cleaning and merging College Board and funding files, then trained a time-series regression model to forecast exam costs 10 years ahead in Python.
- Analyzed how AP fee subsidization policies align with AP participation and college admissions metrics, generating visualizations & recommendations in a public dashboard for students and policymakers.

TECHNICAL SKILLS

Programming: Python, Pandas, NumPy, Matplotlib, GeoPandas, GitHub, Git, VS Code

Software: Claude, Manus, Canva, Excel, Adobe Suite, Tableau

Other: Teamwork, Marketing, Social Media, Communication, Quick Learner, Customer Service
